

Cutrine® Plus Algaecide and Herbicide

Effective control for surface filamentous and planktonic algae

Cutrine® Plus Algaecide and Herbicide effectively controls a broad range of algae, specifically surface filamentous and planktonic algae including: Cyanobacteria, Green algae, Golden algae and diatoms, Filamentous Green Algae and Chara and Nitella as well as the rooted aquatic plant, Hydrilla verticillata.

Advantages

- Visible reduction in algae growth 1 – 2 days after application
- Double chelated formula prevents the precipitation of copper with carbonates and bicarbonates in the water
- Works in 'hard' water
- Ideal for algae on the surface or in the water column – use Cutrine® Plus Granular Algaecide for deeper waters or on bottom-growing algae

Application

- In still or slow waters, dilute the product with enough water to ensure even distribution and spray onto the treatment area.
- For broader spectrum plant and algae control, tank mix with other Lonza herbicides such as Harvester® Landscape and Aquatic Herbicide or Weedtrine® D Aquatic Herbicide.
- The product can also be applied via drip system in flowing waters.

Water Use Restrictions

Waters treated with this product may be used for swimming, fishing, further potable water treatment, livestock watering or irrigating turf, ornamental plants or crops immediately after treatment. **Do not use in waters containing Koi or hybrid goldfish.** Not intended for use in small volume, garden pond systems.

Specifications

Active Ingredient(s)	Contains 9.0% elemental copper (27.9% Copper Ethanolamine Complex, Mixed)
Appearance	Dark blue liquid
Dosing	Dilute and spray between 0.6 – 3.0 gal./acre-ft, depending on target species and density (Hydrilla can be controlled at rates above 1.2 gal./acre-ft)

Packaging
