RODENT BAIT STATION

TECHNICAL SPECIFICATIONS:

- Low profile design for increased rodent activity.
- High capacity bait chamber.
- Bait placement can be done both horizontally and vertically.
- Recessed cover – Does not allow for hands or fingers to attempt to pry open station.
- For additional security there is a hole in the front of the station that allows you to secure the cover to the base by means of a lock or zip tie.
- Ramped entrance into bait chamber helps prevent any water from entering and contaminating bait.
- “Single” lock design decreases service time.
- Can be flush mounted against a wall or structure for maximum effectiveness.
- When flush mounted, lid will remain open for easy servicing.
- Rounded corners inside of station allows for quick cleaning of the station.

SPECIAL FEATURES:

- Heavy duty design using thick walled plastic – Can withstand “stepping on” without any damage to the station.
- Rotating hinge design provides for years of dependable service without the worries that are found with most stations that use a hinge that is permanently attached to the base.

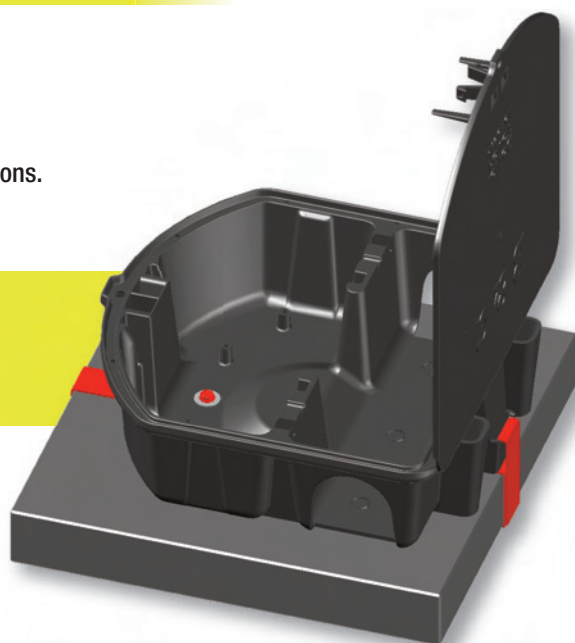

**LOW
PROFILE
DESIGN**

SALES FEATURES:

- Economically priced – at about half the price of the competition but offers improved features as compared to “high end” rodent stations.
- Can be Printed with your Company information for as few as 198 stations.
- Heavy duty key and rod packs included.
- Attractive high tech look.
