

RODENT CONTROL

See a video of this product in action @ www.bgequip.com

FAST CATCH **NEW**

The first true IPM rodent station.

The Fast Catch can be used in IPM programs for monitoring with non-toxic bait and then when activity is present a snap trap can be used for final control. It can also be utilized as a “stand alone” snap trap or rodent bait station.

The Fast Catch station is available in two different models, the first is a station-only design and the second is our “Rodent Alert” design. This Patent pending design features a “pop up” alert that will notify you that the snap trap has been triggered.

- Heavy duty poly construction
- Easy open single lock design
- Reusable – designed for years of service
- Tamper resistant – lid recesses into base
- Low profile design for increased rodent activity
- Fits all professional rat snap traps and includes bait rods
- Long entry pathways keeps the rodent hidden after catch
- Can be used in a variety of applications
- Pop-outs in rear of station allows for attachment to pipes or any other object by use of cable ties

Can be used with snap traps, bait, or a combination of both.

Great places to use the Fast Catch:

- Sensitive Accounts – where rodenticide is banned
- Residential Accounts – keeps rats hidden from occupants
- Commercial kitchens, restaurants and office complexes
