

W-H-Y Trap for Wasps, Hornets and Yellowjackets

The **W-H-Y TRAP for WASPS, HORNETS & YELLOWJACKETS** and the **W-H-Y ATTRACTANT KIT** are proven to lure and trap the following species: Paper Wasp (*Polistes fuscatus*), European Paper Wasp (*P. dominulus*), Golden Paper Wasp (*P. aurifer*), Red Wasp (*P. perplexus*), Paper Wasp (*P. metricus*), Red Wasp (*P. carolina*), Common Paper Wasp (*P. exclamans*), European Hornet (*Vespa crabro*), Bald-faced Hornet (*Dolichovespula maculata*), Aerial Yellowjacket (*D. arenaria*), Blackjacket (*Vespula consobrina*), California Yellowjacket (*V. sulphurea*), Common Yellowjacket (*V. vulgaris*), Eastern Yellowjacket (*V. maculifrons*), Forest Yellowjacket (*V. acadica*), German Yellowjacket (*V. germanica*), Northeastern Yellowjacket (*V. vidua*), Prairie Yellowjacket (*V. atropilosa*), Southern Yellowjacket (*V. squamosa*), Transition Yellowjacket (*V. flavopilosa*), Western Yellowjacket (*V. pennsylvanica*)

DIRECTIONS FOR USE

Initial Setup

1. Remove twist-tie and enclosed Attractant Vial and Attractant Bottle from top chamber.
2. Remove Attractant Tube and felt pad from bottom chamber. (Leave cone in place.)
3. Bait the bottom chamber first:
 - a. Place felt pad into center of bottom cap.
 - b. Cut tip of Attractant Tube.
 - c. Carefully empty attractant liquid onto felt pad.
 - d. Screw bottom cap back in place.
 - e. Set trap on flat surface.
4. Next, bait the top chamber:
 - a. Remove Attractant Vial from its plastic pouch.
 - b. Pop open lid to Attractant Vial and snap into one of three notches next to the cone in the top cap. (Figure 1)
 - c. Pour Attractant Bottle contents into top chamber.
 - d. Add water to top chamber so solution reaches the Start Line. Add 1-2 drops dishwashing liquid to the water mixture.*
 - e. Thread twist-tie through hole on top cap.
 - f. Screw top cap back on and hang trap outdoors. (Figure 2)

Trap Placement:

1. Hang trap away from human activity.
2. Hang at least 20 feet away from a known wasp, hornet or yellowjacket nest.
3. In extreme hot and dry weather, hang trap in the shade.

Top Chamber:

*Adding dishwashing liquid to the water mixture in the top chamber will coat the insects' wings and make it harder for them to fly once trapped. In hot and dry weather, liquid level in top chamber may evaporate below the Start Line before the attractant is due to be replaced. Do NOT add additional water to bring the liquid back up to the Start Line, as it will reduce attractant effectiveness.

Reusing the Trap:

The attractants in the W-H-Y Trap are designed to last 2 weeks. W-H-Y Attractant Kit refills, which last an additional 2 weeks, should be available for purchase wherever the W-H-Y Trap is sold. Refills are also available through various online retailers; please visit www.whytrap.com for details.

1. Check to make sure all trapped insects are dead.
2. Empty dead insects and wipe insect residue from trap. (Top chamber cannot be emptied of insects without replacing the attractant.)
3. Follow directions for baiting the bottom and top chambers in the initial setup instructions.

Catching the Queens:

Wasp, hornet and yellowjacket queens emerge from hibernation during the first warm days of spring to look for new nest sites. When you place the **W-H-Y Trap** outside at that time, you can capture the queens and reduce the likelihood that a nest will be established on or near your property. If queens have already begun building their nests, the W-H-Y Trap may have periods of lower catches until the worker populations emerge.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Contents of Attractant Bottle may cause eye and skin irritation. Keep away from eyes and skin. Wash hands after handling product.

Due to the extreme effectiveness of the attractant, use caution when placing and maintaining traps. Place and maintain traps in late evening or early morning when insects are less active. People allergic to stings should allow others to place and maintain traps for them. Wasp, hornet or yellowjacket stings can be fatal.

NOTICE: Buyer assumes all risks for use not in accordance with instructions and cautions.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry, well-ventilated location out of reach of children and pets.

DISPOSAL: Deposit used attractant and attractant packaging in trash for collection. Wash hands with soap and water.
