CUT Guard®

Biological Plant Wound Dressing

Call Today
For More Information On
Cut Guard
A Biological Cutting Edge
Product!

Biological active product that aids in the sealing and compartmentalization of plant wounds caused by pruning, cutting, string trimmers and accidental damage.

- * Forms a “breathable” film for air transpiration on the wound
- * Contains wound protective UV inhibitors
- * Prevents fungi entry into wounds
- * Prevents insect invasion into wounds
- * Signals plants to form callus protective tissue in and around the wound

Quest
Products Corp.

Finding new ways to improve the treatment of trees and plants.

11712 230th St.
Linwood, Kansas 66052
