

**Unique
7-strain
formulation!**

Beneficial Microbial Soil and Root Inoculant

TerraGrow is a powdered blend of carefully selected beneficial bacterial and fungal spores that was developed to improve soil characteristics and plant stress tolerance for a wide variety of crops, including fruits, vegetables and row crops. TerraGrow quickly reestablishes beneficial bacteria and fungi populations in and around the root zone.

Easily incorporated into any crop protection program, TerraGrow can be used throughout the growing season to improve soil health and plant vigor. Use in conjunction with TerraClean 5.0 bactericide/fungicide for a complete soil treatment program.

TerraGrow Fungal Inoculants

Trichoderma harzianum

Trichoderma reesei

Growth Boost Package

Humic acids

Amino acids

Sea kelp

TerraGrow Bacterial Inoculants

Bacillus licheniformis

Bacillus megaterium

Bacillus subtilis

Bacillus pumilis

Bacillus amyloliquefaciens

Features & Benefits

- Completely water soluble
- Guaranteed one-year shelf life
- Ideal for use with TerraClean 5.0
- Naturally occurring microbial strains
- Active ingredient: microbial inoculants and nutrients
- Available in 10 and 25-pound containers
