

CONTRAC[®]

WITH LUMITRACK[®]

IDENTIFY, TRACK & ELIMINATE

PRODUCT FEATURES:

- ▶ Contains the single-feed, second-generation anticoagulant Bromadiolone
- ▶ Enhanced with the illuminating capability of Lumitrack[®], an additive that makes rodent droppings glow bright green under black light for tracking and identification purposes
- ▶ Formulated with food grade ingredients for excellent rodent acceptance and control
- ▶ Excellent clean-out and maintenance bait to control mice and rats, including warfarin-resistant Norway rats
- ▶ A hole in the center of the Blox lets technicians place it on bait securing rods in tamper-resistant bait stations, or nail or wire the Blox in place
- ▶ Improved preservative system prevents mold growth when exposed to 100°F temperatures and 95%+ relative humidity

PRODUCT	CODE	CASE QTY
▶ Contrac Blox	CL4040	4 lb. Pail - 4 per case
Contrac Blox	CL1018	18 lb. Pail

REVOLUTIONIZE YOUR SERVICE

IDENTIFY

DISCOVER SPECIES TYPE

- Lumitrack aids in the speedy detection of rodent droppings which can determine species type and the size of the infestation

DETECT NON-TARGET CONSUMPTION

- Determine whether a non-target animal or child has ingested the bait by shining black light into their mouth. If ingestion occurred, their mouth will glow bright green

EASILY INSPECT INBOUND PALLETS

- Inspecting inbound pallets will become more accurate by enhanced visibility of droppings
- Can be used upstream in the supply chain to ensure accuracy at receiving ports

ROOF RAT FECES

NORWAY RAT FECES

TRACE ENTRY POINTS AND RODENT PATHWAYS

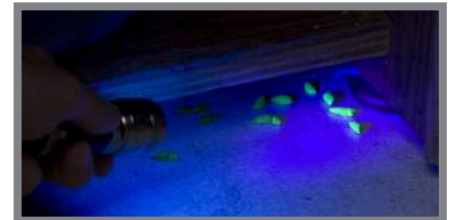

- Glowing droppings help track the distance rodents travel and possible zones in which nests are located

WORK FROM THE OUTSIDE - IN

- Track droppings back to the specific location or building from which the rodents may be originating

DETERMINE HIGH ACTIVITY AREAS

- Illuminated feces aid in tracking the high-activity trails of rodents.
- Population sources and reservoirs can be profiled
- Confirm activity in structural rodent burrows (i.e. wall/floor voids, exterior sidewalks and foundation wall burrows)

STRENGTHEN YOUR IPM PROGRAM

- Bolster your IPM program by gaining insight on the behavior of resident pest populations
- Reduce the number of callbacks by tackling the rodent problem at the source

IMPROVE YOUR BAITING STRATEGY

- Reveals harborage and pathways of rodents to allow you to place your bait more efficiently

ENHANCE YOUR RODENT PROOFING CAPABILITIES

- Rodents that have consumed Contrac with Lumitrack are easier to trace and easier to predict
- Eliminate the possibility of reentry by rodent proofing after you have eradicated the problem
