

FIESTA®

TURF WEED KILLER

Broadleaf Herbicide

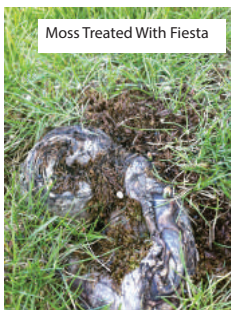

Kills Weeds, Not Lawns

Active Ingredient - Iron HEDTA.....26.52%

Fiesta® Turf Weed Killer is a selective, broadleaf weed killer that leaves turf healthy and weed-free using a patented formulated iron chelate solution that even controls moss and algae. Fiesta works quickly, delivering visible same-day results, even in cool weather, and has no unpleasant odor during or after application. People and pets can re-enter the treated area once the spray is dry to avoid staining.

Controls or Suppresses Weeds Such As:

- | | |
|-------------------------------|--------------------------|
| ■ Algae | ■ Healall |
| ■ Black medic | ■ Lichens |

What is **Fiesta**?

- A reduced-risk bio-herbicide for turf
- A reduced-risk alternative to 2,4-D and similar herbicides
- The active ingredient in Fiesta is iron chelate
- An excellent tool for sensitive sites

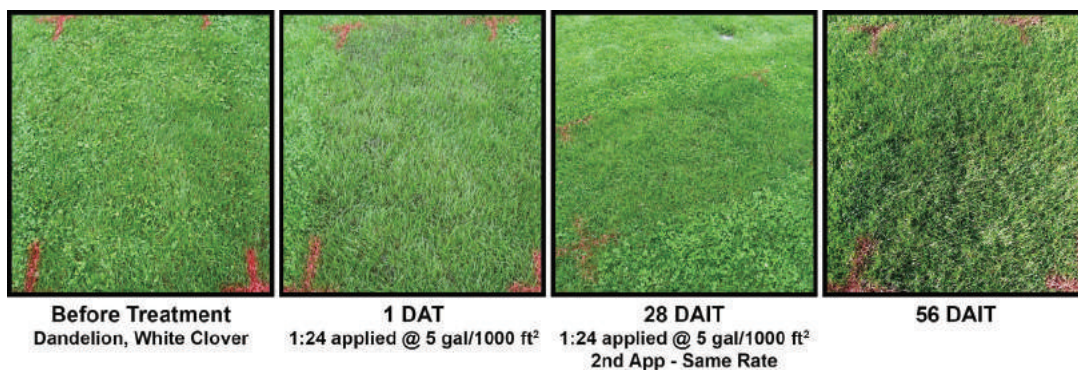

What Results Can I Expect From **Fiesta**?

- Visible results in 24 hours, even in cool or cold weather
- Rain-fastness 3 hours after application
- No odor
- No staining of hardscape materials*
- Control or suppression of many common turf weeds (see product label for specifics) and moss/algae

How Does **Fiesta** Work?

- Iron phytotoxicity, an oxidative process
- Fiesta affects broadleaf plants much more strongly than it does grasses
- Competition from healthy, vigorous turf is part of the activity

Why Should I Use **Fiesta**?

Less Toxic Alternative

- Minimizes public exposure to conventional pesticides
- Less toxic than table salt, vinegar and aspirin
- Will not contaminate surface or ground water when used according to the label
- To avoid staining, people and pets may re-enter the treated area when spray is dry
- Non-volatile
- Non persistent in the environment due to rapid degradation in sunlight

Flexible

- Treated turf can be re-seeded or over-seeded 24 hours after treatment
- Newly-seeded turf, can be treated just 7 days after germination

*May stain wooden surfaces
