

Bird Traps

Sparrows and Starlings in a facility are messy and difficult to catch.

The Trap Door makes it easy. Sparrows hear the friendly chirp, see the food, step on the perch, and fall inside unharmed. The trap contains the bird waste, bait etc. It is a hygienic way to contain the birds until they can be removed from the building.

Preventative Sparrow and Starling Control

Place traps where birds are anticipated, and catch them when they first enter. The audio can be programmed to work with any schedule.

Sparrow Call Dramatically Increases Efficacy

The Trap Door is four times more effective with the optional audio attractor. The call operates on an intermittent basis so birds don't get used to it. There are ten different programs to choose from. Use on the Trap Door, or to draw sparrows into a mist net or cage trap.

The Sparrow Trap Door has become a hit at commercial airports! Completely safe for public areas. In just three years we've sold thousands of trap doors globally to help relocate birds trapped indoors.

For 2018 we've made the Trap Door even more powerful tool for your arsenal by offering the Bird Alert - now your trap is autonomous and will text its status to your mobile phone! First trap of its kind to text you when it catches a bird.

Receive a Text Message when your Sparrow Trap Door traps a bird.

The Bird Alert is a simple and powerful tool that will notify you instantly when your Sparrow Trap Door has caught a bird. The Bird Alert saves time, fuel and fleet costs. It promotes safety by reducing the frequency of checking traps in hard to reach or hard to access locations. Most importantly the Bird Alert reduces stress on the bird.

- Fast and easy to set up
- One week battery life, or up to a month with plug-in battery (sold separately)
- Adheres firmly to your existing traps
- Has its own SIM card, sends its message directly to you through the carrier
- Affordable data plans available

new

Positioning

The trap should be placed high up in the facility near the most bird activity. Put on a shelf or hang from a pipe. Set the trap to the open position and bait and check regularly. Multiple traps will be necessary in large facilities. Detailed instructions are included.

High-Reach Pole Mounting

Now Trap Doors can be positioned on high shelves and hung from pipes (hanger included) from the safety of the ground. All Trap Doors now ship with a pole attachment riveted to the back, which accepts Bird Barrier's aluminum extension poles (see page 63).

Convert to a Multi-Catch

The Trap Door can be secured to the top of a Bird Barrier sparrow trap. The Trap Door captures the first bird and drops it into the cage trap. Once inside that bird attracts more birds. See page 52.
