

Soil Surfactant | Foliar Adjuvant | Utility

THE WORKS

THE WORKS is a full service adjuvant, tasked to buffer the pH of spray tank solutions, increase pesticide spray tank stability, improve spray deposition, reduce drift and increase cuticle penetration. **THE WORKS** is the best insurance in maximizing your spray tank investment. Made from Lecithin, **THE WORKS** is an aggressive penetrant, providing maximum uptake, while gentle to the plant.

pH Buffer | **Plant Penetrant** | **Deposition and Drift Aid**

Application Instructions:

Turf and Ornamental: 1-4 pints / 100 gal. water

Non-Crop: 1-8 pints / 100 gal. water

Herbicides: 1-4 pints per 100 gal. water

Insecticides, Fungicides and Nutritional: 1-2 pints / 100 gal. water

Features and Benefits

- pH tank buffer
- Improved spray deposition
- Drift reduction
- Increased cuticle penetration
