

InVict **XPRESS** granular bait

Powerful, Fast New Bait for Pest Management Professionals

For pest management professionals who don't have time to wait for results when dealing with an active insect infestation, InVict Xpress Granular Bait provides fast kill of a broad range of crawling insects. The proprietary bait matrix contains multiple food attractants for fast attraction and 0.5% imidacloprid for fast kill. InVict Xpress is labeled for a wide range of ants, cockroaches, crickets, mole crickets, silverfish, firebrats and earwigs.

Versatility & Ease of Use

The InVict Xpress label is very expansive including sewers, transport vehicles and

indoor and outdoor applications at residential, commercial, institutional, educational, animal research, and agricultural facilities, as well as food service, storage, handling and processing establishments. Turf sites include lawns, landscape beds, ornamental turf, parks, playing fields, right-of-ways, golf course greens and tee boxes, and home greenhouses.

InVict Xpress can control insects in places where pyrethroid insecticides simply cannot

such as crawling insect control on impervious surfaces, and in sewers. InVict Xpress also provides flexible fast control of existing ant infestations on residential, commercial turf and golf courses. The use rate is only 4-8 oz per 1000 sq ft and does not require the applicator to wear PPE.

For golf courses, when quick results matter, InVict Xpress provides fast control of ants, crickets, mole crickets and other crawling insects around tee boxes and greens. The proprietary bait matrix attracts ants fast and kills the entire colony, not just the ants you see.

For those seeking a fast acting, broad spectrum granular bait with wide use flexibility, InVict Xpress will provide an Unfair Advantage in the field.

Available in 8 oz and 4 lb shakers and 25 lb cartons.

Crickets

Cockroaches

“Roaches fed on bait immediately; saw roaches within 10 seconds picking up granules down in the harborage. These roaches were out of cracks and dying/tremors 15 min later (and fire ants were eating them).

—Univ. of Georgia

”

“I've had an account where we struggled with American roaches for five years. Recently, I met Pat Ryan at a show and he told me about Rockwell's new InVict Xpress Granular Bait. I took it out to this account and gave it a try. I've never seen so many dead roaches in my life. The results were amazingly quick and I also saw ants picking up the granules and taking it away. I've been in business for over 30 years and this is the best roach product I've seen in a long time. Rockwell has a homerun with this bait.

- Kevin O'Connor, Eliminox Pest
