

Bait and switch

*Rotate two different formulations
to prevent cockroach bait aversion*

Alpine®

Cockroach Gel Bait
Rotation 1 & 2
Reservoirs

When a single gel bait product is used exclusively for roach control, research shows that cockroach strains can demonstrate feeding aversions. BASF developed **Alpine®** cockroach gel bait rotation 1 reservoir and **Alpine** cockroach gel bait rotation 2 reservoir to help prevent bait aversion from developing in your accounts.

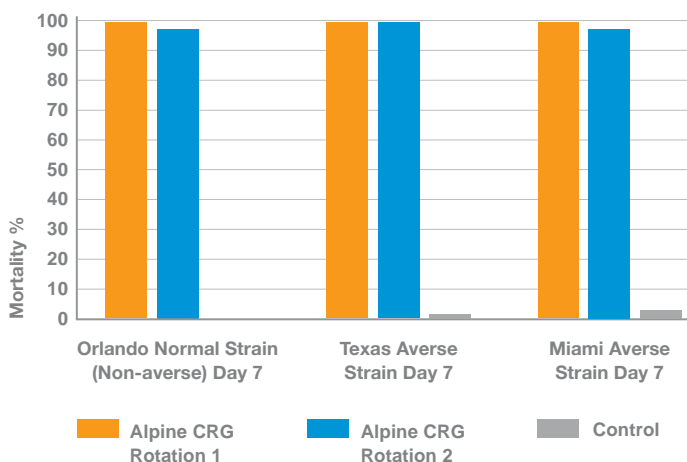

This fast-acting duo, a part of the Complete Cockroach Solution, provides baits that are attractive to both gel-bait-averse and non-gel-bait-averse cockroaches.

Use this rotation system with confidence, knowing that each formulation provides different food ingredients and quick, reliable control.

- **Attractive:** Both bait matrices appeal to gel-bait-averse and non-gel-bait-averse cockroaches.
- **Fast-Acting:** These BASF products begin killing cockroaches within minutes after exposure to the bait.
- **Reliable:** This rotation system guarantees different food ingredients in each formulation.

Attractive Baits

Efficacy of Alpine® Cockroach Gel Bait Rotation 1 & 2 Matrices Against Normal and Gel-Bait-Averse German Cockroaches

Dangsheng, Liang, PhD., Apex Bait Technologies, Inc.,
Report Number: 1505. Date 11/2009

Offers two palatable bait matrices appealing to gel-bait-averse and non-gel-bait-averse cockroaches

Reliable Rotation System

Alpine Cockroach Gel Bait Rotation 1 Reservoir
Article#: 59014068

Alpine Cockroach Gel Bait Rotation 2 Reservoir
Article#: 59014067

Packaging: 1 Box (4x30 gram) Syringes

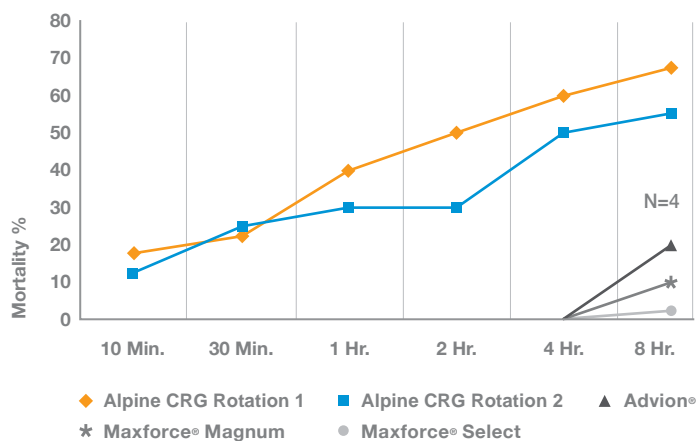

Guarantees very different food ingredients in each formulation

Always read and follow label directions.
