**2**

**Straw insert** (for drain, crack & crevice injections)

**3**

**24" flexible extension hose** (for deep injections in drains & hard to reach spots)

**InVade**  
technology

# Hot Spot<sup>+</sup>

***Includes the Same Key Product Features that Made the Original Hot Spot the Best Selling Bio Sanitation Aerosol Foam in the Industry***

- ***The powerful microbes in Hot Spot<sup>+</sup> digest fats, oils, grease (FOG), protein, carbohydrates, cellulose and urea...now faster than ever!***
- ***The 360° valve allows Hot Spot<sup>+</sup> to be sprayed in any orientation (upright, sideways and upside down) for easier applications.***
- ***The thick, long-lasting foam from Hot Spot<sup>+</sup> provides maximum contact time for microbes to go to work. The thicker, stiffer foam also provides greater push for deeper penetration down drain line pipes.***
- ***The 24 inch extension hose is only 7mm wide, and can fit in a drain grate as small as 4mm due to its flexibility so you don't have to remove drain plates. The extension hose is also designed to be reusable to reduce waste.***
- ***Eliminates odors caused by organic matter such as food debris, urine, feces, vomit, smoke and dead animals. It does not mask odors.***
- ***Is biodegradable and will not harm septic systems or municipal water treatment operations.***
- ***Is the ultimate green cleaner that works more effectively than simple chemical cleaners in areas of chronic moisture and organic matter.***
