

Introducing the New Target Specialty Products Sprayer Upgraded with Premium Stainless Steel Pump Cylinder, Siphon Tube, & Wand

STAINLESS STEEL 1-GALLON SPRAYER

TARGET ITEM # 1517330

ENGINEERED TO ENDURE

Built with a stainless steel pump cylinder, siphon tube, and wand, plus Viton® seals and gaskets, to endure harsh chemicals and demanding job environments.

WEATHER-RESISTANT

In freezing climates, when liquid freezes it expands, building pressure in the sprayer. This often leads to cracks in the sprayer's most vulnerable component: the wand. With all stainless steel, the metal is less likely to break due to such low temperatures.

PRECISION SPRAY

The 4-way adjustable tip with two fan spray and two pin stream options means consistent performance, accurate spray & less waste.

PREMIUM HOSE ASSEMBLY

Count on the chemical-resistant hose with spring strain relief for lasting resilience under frequent strain, delivering both durability and effortless usability.

INDUSTRIES

Disinfection
Pest Control
Industrial
Concrete
Landscape
Mold Control

COMPATIBILITY

Water-Soluble Granules
Water-Based
Formulations
Oil-Based Formulations
