

Versa-Fogger

The first true gasoline powered backpack fogger. The Versa-Fogger is a jointly developed product between B&G and Curtis Dynafog. Unlike a conventional mistblower, by adjusting the output of the nozzle, this unit is capable of providing a broad range of flow rates and particle sizes for proper insect control.

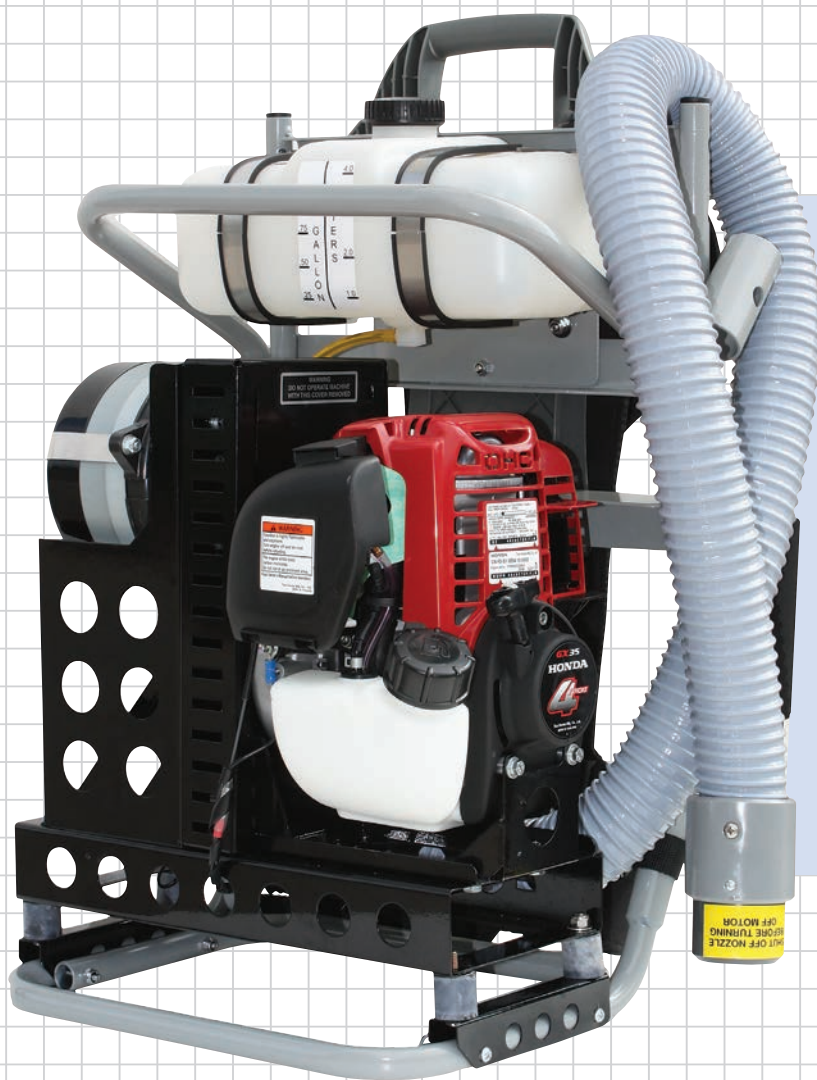

1

Versa-Fogger

The Versa-Fogger is designed for a wide variety of applications from Mosquito Control to Insect Control in a warehouse environment. Its heavy duty, all metal construction, along with a deluxe backpack harness will give years of dependable service.

The Versa-Fogger provides a finely atomized fog at a high velocity. It provides good penetration into foliage along with a far reaching fog plume to treat remote areas.

- Reliable Honda 4 stroke motor - No need to mix oil with the gas
- Lower operating costs as compared to a 2 stroke motor
- Emissions compliant motor
- Transistorized ignition insures a quick start every time.
- High strength aluminum frame
- 1 Gallon formulation tank
- Adjustable handheld nozzle. Can be adjusted from a very fine to heavy fog
- Three stage rotary blower - Creates high pressure air for optimum atomization of liquid
- Lightweight - less than 26 lbs (dry weight)
- Quiet 4 stroke operation
- .67 quart fuel capacity
- Carrying handle
- 2 Year motor warranty (1 year other components)
