

# XLure R.T.U. MST Beetle Traps provide a perfectly enticing environment for Stored Product Beetles....

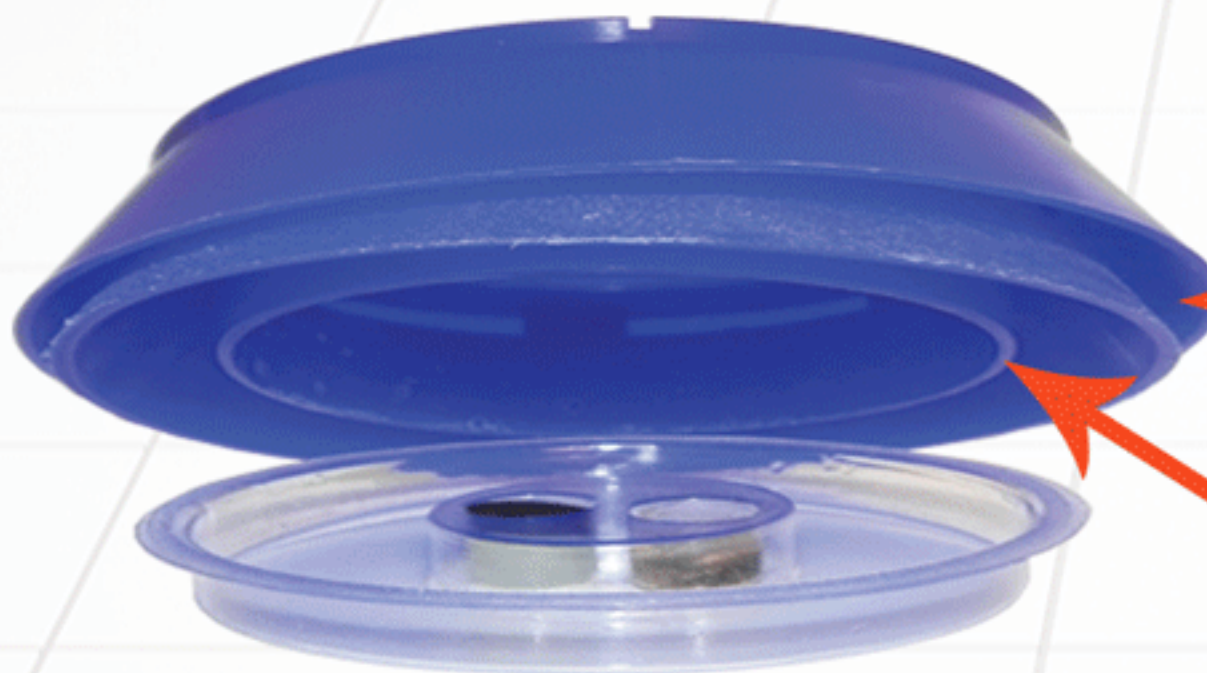

The top of the trap body completely covers a slotted base, keeping dust & debris out.

Angled body encourages upward movement of beetles.

A tab at the top of trap can be used with the XLure Tether system to secure the trap in place, preventing unwanted removal/displacement.

An all-around crevice created between the top of the trap and base of the trap is enticing to stored product beetles which are seeking sex, food and shelter.

A rough textured crawl crevice all around the trap base makes climbing up and into trap easy.

Slick, straight up & down interior walls make escape impossible.

No messy liquids to accidentally spill out of trap
