

When weatherability and durability are paramount.

- Recently reformulated for increased palatability
- Mold protection for a longer-lasting block
- Block durability for easy bait station clean-up
- Weatherability for the toughest baiting conditions
- Great for audited accounts

BlueMax™

Rodenticide

Outlasts other blocks.

A poor audit score can cost you a customer. With BlueMax, you'll get bait longevity and a cleaner, better-looking bait and bait station.

Cost—Keeping bait fresh longer reduces bait waste.

Durability—Three preservatives engineered for long-lasting mold protection.

Weatherability—Lasts despite high humidity and moist conditions.

Easy to Clean—Reduce bait scatter, increase audit score.

- Recently reformulated for improved palatability without losing durability
- Effective at 25 ppm: Reduced active ingredient in bait, increased palatability and decreased risk
- Mold protection for a longer-lasting block
- Makes bait station easier to clean
- Food-grade ingredients specially formulated to reduce bait scatter
- Homogenous mixture of food-grade grains
- Less bait replacement saves money
- Difethialone: Still the most advanced single-feed anticoagulant available
- Effective on roof rats, Norway rats and house mice
- Contains no peanut ingredients
- Readily available anticoagulant antidote: Vitamin K₁
- Meal formulation is labeled and designed for Norway rat burrows
