

Safari® 20 SG

Where the Wild Things Aren't.

Safari® 20 SG Insecticide, a super-systemic insecticide with quick uptake and knockdown, controls a broad spectrum of ferocious and invasive pests, including Q- and B-biotype whitefly, Hemlock woolly adelgid, emerald ash borer, mealybug, leafminer, fungus gnat, black vine weevil, glassy-winged sharpshooter, armored and soft scales and lacebug—some of the most costly pests that affect trees, shrubs and herbaceous ornamentals in the landscape and production ornamental markets.

TAKE OUT THE TOUGHEST PESTS

- Super-systemic: fast uptake, increased concentration
- Broad-spectrum control, including Q- and B-biotype whiteflies
- Unsurpassed residual control

EPA REG. NO.	86203-11-59639
ACTIVE INGR.	dinotefuran (20%)
FORMULATION	water soluble granule
CHEM. FAMILY	neonicotinoid
IRAC NO.	4A
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	16 x 12 oz bottle, 4 x 3 lb bottle

 RESIDENTIAL

 COMMERCIAL

 LANDSCAPE ORNAMENTALS

Grow a better tomorrow.

Safari® 20 SG

KEY USES

Commercial and residential landscapes
Greenhouse and nursery ornamentals
Interior plantscapes
Landscape ornamentals (*commercial, industrial, recreational, and residential*)
Non-bearing tree fruit, nut, and vines
Vegetable and vegetable transplants grown in enclosed structures

KEY PESTS CONTROLLED

(See product label for complete list)

Adelgid
Aphids
Armored and soft scales
B-biotype whitefly
Emerald ash borer
Flatheaded borers
Fungus gnat larvae
Glassy-winged sharpshooter
Japanese beetle (*adults*)
Lacebug
Leaf beetle
Leafhopper
Leafminer
Mealybug
Psyllid
Q-biotype whitefly
Root weevils
Roundheaded borer
Thrips (*suppression*)
White grub

USE SUMMARY

APPLICATION TO ORNAMENTAL PLANTS

Safari® 20 SG Insecticide can be applied as a foliar spray, broadcast spray, soil drench, soil injection, basal bark spray, and via chemigation for insect control in ornamental plants in greenhouses, nurseries, outdoor landscapes and interior plantscapes.

Safari 20 SG Insecticide is a systemic product and will be taken up by the root system and translocated upward throughout the plant. When applied as a foliar spray, the product offers translaminar and locally systemic control of foliar pests.

When applied to the soil, Safari 20 SG Insecticide will be translocated more quickly in herbaceous plants than in woody shrubs and trees. Speed of insect control will range from as little as one day for small herbaceous plants in containers, to several weeks in larger trees growing in the landscape.

For outdoor and landscape ornamentals, broadcast applications cannot exceed a total of 2.7 lbs of product (0.54 lb active ingredient) per acre per year.

GREENHOUSE

Foliar spray: 4-8 oz/100 gal

Soil drench: 12-24 oz/100 gal

LANDSCAPE

Foliar spray: 4-8 oz/100 gal

Soil: 1.0-4.2 oz/10 inches of trunk diameter, 1.0-2.1 oz/ feet of height

Basal trunk spray: 12-24 oz/gal, 1 gal/65-85 dbh

See label for complete directions for use.

PRECAUTIONS AND RESTRICTIONS

DO NOT graze treated areas or use clippings from treated areas for feed or forage.

Prevent runoff or puddling of irrigation water following application.

Keep children and pets off treated areas until spray has dried.

DO NOT apply to areas that are water-logged or saturated or frozen, which will not allow penetration into the root zone of the plant.

See label for complete application precautions and restrictions.
