

MOLE SCRAM™ is Guaranteed to eliminate mole activity! Our all natural, organic repellent contains 3 active ingredients, more than most other brands. Mole Scram's active ingredients help to make it effective in attacking three of the mole's main senses and needs - taste, smell, and diet. Mole Scram is an excellent preventative measure. Spring & Fall applications of our Easy-to-use Granular Formula will get rid of moles in your yard! **Mole Scram is fully backed by EPIC's 100% Guarantee.**

Application instructions: Using the shaker container or rotary spreader, cover the entire area where moles are present. Apply Mole Scram **DAY 1** to 50% of lawn starting at area furthest from where you want moles to exit and water for 20 minutes. **Day 2** apply Mole Scram to the remaining 50% of the affected lawn and water that area for 20 minutes. Apply 1 lb. per 750 sq. ft. **NOTE: Watering or rainfall is the key to activation and begins the repelling process. Please be patient.**

While Mole Scram is fast acting, it may take several days for the mole(s) to leave the treated area. **SEE APPLICATION INSTRUCTIONS INSIDE.**

PRECAUTIONARY STATEMENTS Wash skin after use. Avoid contact with eyes or cuts. If in eyes, flush with water for 15-20 minutes. Call Poison Center or doctor for treatment. **Storage:** Store in original sealed container away from direct sunlight. Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water. **Disposal:** Do not reuse empty container. Dispose of properly. Buyer assumes all responsibility for safety & use not in accordance with directions. **Product exempt from EPA registration under Section 25 (b) of FIFRA**
