

Lawn Product Portfolio

With Syngenta, you have optimized formulations, strong technical field support, continual product research, industry support, and cutting-edge programs to help you create the plush, green lawns you and your customers want.

Herbicides

Barricade® Herbicide

- Long-lasting pre-emergence herbicide controls crabgrass and more than 30 other weeds in dry or wet weather.
- Application timing flexibility—a wide window for spring or fall applications.
- Dial-in rates determine length of control required.
- Application flexibility with 4FL (liquid), 65WG (wetttable granule), and on-fertilizer formulations.
- Includes a crabgrass breakthrough guarantee.

Departure™ Herbicide

- A unique, proprietary formulation that's nearly 40% more concentrated than the leading glyphosate.
- Fewer jugs mean less time spent triple rinsing, less shelf space taken up, and less environmental waste.
- Rainfast in 30 minutes.

Monument® Herbicide

- One of the most effective products for control of all the major sedge species.
- Post-emergence control of 43 broadleaf weeds and grasses.
- Great tank-mix partner with Barricade® herbicide for both spring and fall applications for pre- and post-emergence control of broadleaf, sedge, and grass weeds.
- For use on bermudagrass and zoysiagrass turf.

Tenacity® Herbicide

- For cool-season turf; approved for use on residential turf and most other turf areas.
- Can be used at seeding, eliminating weeds, so new grass can flourish.
- Provides post-emergent control of tough weeds, such as nimblewill, bentgrass, and nutsedge.
- Prevents and controls crabgrass pre or post up to 4 tillers.
- Available in convenient 8-oz bottles with residential label (1-gal jugs with residential label coming soon).

Pennant Magnum® Herbicide

- Up to 90-day pre-emergence control of yellow nutsedge, crabgrass, and many other annual grasses and broadleaf weeds.
- Unique mode of action; a shoot inhibitor that does not affect new root growth.
- A great option for turf species that have significant root development from stolons, such as St. Augustine grass.
- May apply over a wide range of ornamental plants, even over the top of new ornamental plantings.

Princep® Liquid Herbicide

- Pre-emergence control of many annual broadleaf and grass weeds, including crabgrass, goosegrass, and groundsel.
- Offers pre-emergence control of winter annual weeds.
- For use in a broad range of residential and commercial lawns.

Reward® Landscape and aquatic herbicide

- Fast-acting non-selective herbicide, works in just hours.
- Ideal for use as a trim and edge tool.
- Also, labeled for aquatic uses.

Fusilade® II Herbicide

- Selective post-emergence herbicide for ornamental beds at residential accounts.
- Suppresses bermudagrass growing in tall fescue or zoysia turf at commercial properties.
- Controls a long list of perennial and annual grass weeds; even difficult-to-control weeds like quackgrass or common bermudagrass.
- Use over the top or as a directed spray over plantings, eliminating time needed to hand weed.
- Rainfast in one hour, allowing for flexible application.

Fungicides

- Longest-lasting broad-spectrum strobilurin fungicide.
- As a systemic strobilurin, it will not wash off or be mowed away—it even protects new growth.
- Excellent control of brown patch, gray leaf spot, red thread, leaf spot, summer patch, take-all patch, and more than 15 other turf diseases.
- Heritage® G, a high-performance granular formulation, complements two sprayable options.

- Premier fungicide for preventive dollar spot control.
- Broad-spectrum protection against dollar spot, leaf spot, summer patch, brown patch, and many other diseases.
- Systemic properties for rainfast protection up to 28 days.
- Highly compatible, easy-mixing MAXX® formulation with a *Caution* signal word.

- Featuring dual modes of action for broad disease control.
- Controls all major turf diseases, including brown patch and dollar spot.
- Optimized formulation offers low application rates (0.75 oz/1,000 ft²) to provide efficient control.
- Broadest 28-day control available at full label rates.

Plant Growth Regulator

- Provides both turf growth management and improved turf quality.
- Promotes rich color, lateral stems, and improved root structure.
- Results in a healthy, more durable lawn.
- Pre-stress conditioning protects lawn from heat, drought, disease, and use.
- Fewer mowings help save fuel and labor costs and reduce clipping disposal.
- Excellent profit opportunity for current and potential customers.

Insecticides

- Broad-spectrum control of grubs and a variety of soil and foliar pests.
- Flexible watering requirements.
- Wide application window for control of grubs and a variety of soil and foliar pests.
- Quick and effective curative control through late second instar of grub development.
- Gentle and effective on turfgrasses, shrubs, and trees.
- Available in sprayable WG (wetttable granule) and spreadable G formulations.

- Easy to apply, providing outstanding control of fire ants.
- Works with simple fall and spring "two-step" plan.
- Sterilizes the queen and collapses the mound.
- Also controls big-headed ants, preventing mound relocation and re-infestation.
- Easy on non-target beneficial insects.

- Fast-acting, long-lasting control of surface insects in turf and landscapes.
- Advanced pyrethroid technology in a microcap formulation remains potent even after long outdoor exposure.
- Controls cutworms, adult beetles, and more than 70 other insect pests at low rates.
- **Scimitar® GC is a Restricted Use Pesticide.**
