## TechTip

### There's an APP for that...

Whatever information you may need in the field, there's probably an app for that (sometimes several). If you need to dodge traffic to get to a stop on time—App for that, need to ID a certain species of cockroach—App for that, need help with measurements or conversions—App for that! But how do you choose which ones are right for you? There are so many to choose from that you may need to test a few out yourself or ask other technicians for references. A few top rated apps we recommend are: Google Maps, EasyMeasure, NPMA Field Guide, and iPest1, iPest2 & iPest3.

No matter what apps you choose to use, always follow your company policy on handheld/device use and be aware of state and local regulations regarding cell phone usage while in your vehicle.
