Rodent
Monitoring System

Bayer rodent monitoring and pest control solutions

Rodent prevention starts with knowing when and where, in real-time.

/// Rodent Monitoring System

The Bayer Rodent Monitoring System (RMS) is a wireless network of high-tech trap sensors that provides 24/7 monitoring, real-time capture alerts and up-to-the-minute rodent program verification. It helps enable a more proactive, effective pest management while helping to ensure food safety and audit readiness.

- // 24/7 monitoring
- // Real-time capture alerts
- // Daily system status reports
- // Time-stamped data for faster root cause analysis
- // Improves audit readiness and compliance
- // Available for indoor and outdoor use

//// Mitigate risk and safeguard public health

Food safety, transparency and audit readiness in food handling accounts are critical. Bayer has been an industry leader for years with proven pest management solutions like Maxforce® and Suspend® PolyZone®. Now we're revolutionizing rodent control with the Bayer Rodent Monitoring System. Put everything together for game-changing success and more time to do effective, integrated pest management while mitigating risk and safeguarding public health.

Graphic floor plan

Heat maps showing areas of rodent pressure are automatically generated by capture data provided from the network of deployed devices.

Get unstoppable staying power even in wet, greasy environments.

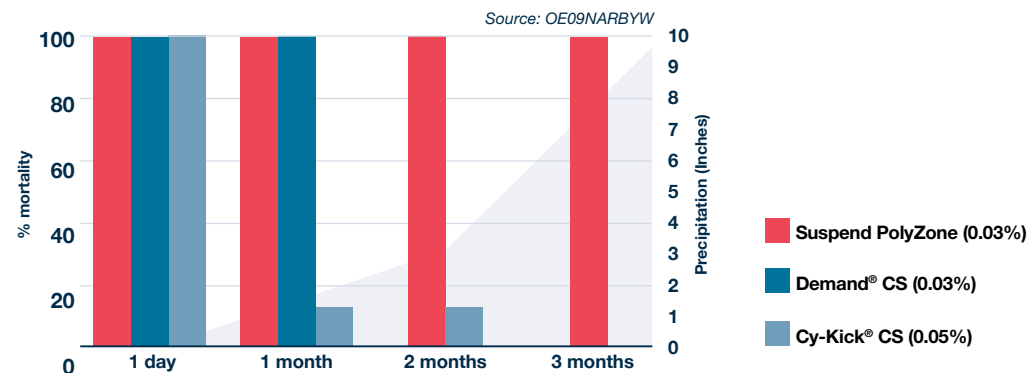

/// Suspend® Polyzone®

Suspend PolyZone combines the trusted active ingredient, deltamethrin, with a proprietary polymer suspension that locks the AI in place. It stays effective where it's sprayed even in tough conditions.

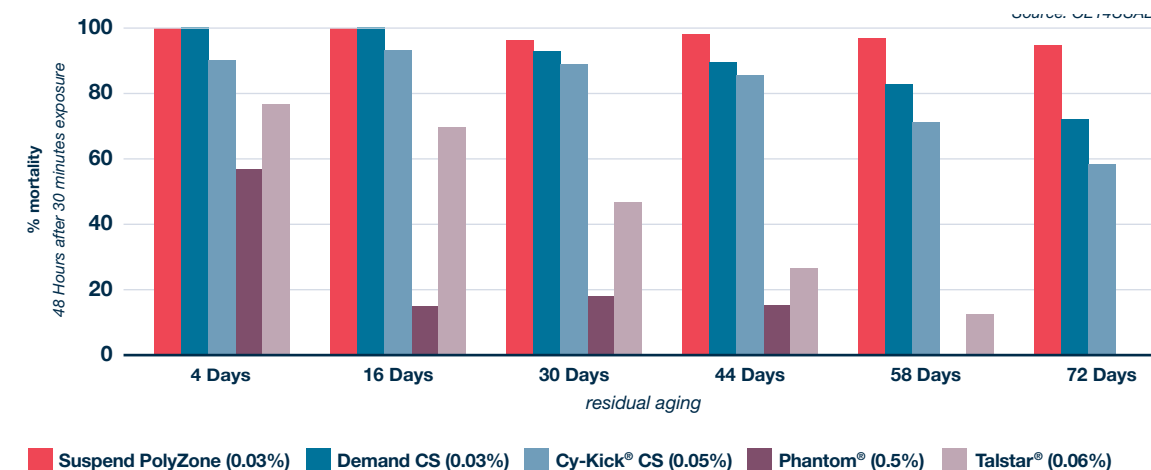

- // Proprietary polymer formulation locks the AI in place
- // Proven reduction in callback frequency
- // Broad-spectrum pest control with fewer applications
- // Apply via crack & crevice or spot treatment along door moldings, edges of walls and shelving and furniture legs

Long-lasting residual/excellent wash-off resistance.

Dirty, greasy surfaces tie-up AIs, making them unavailable.

Only Suspend PolyZone maintained efficacy above 90% for the entire 10 weeks.

Confidently stop bait averse cockroaches with Maxforce® – the only roach control system you need.

/// Maxforce®

The Maxforce® Roach Control System brings together the cleanout power of Magnum, the rotational benefits and EPA reduced-risk designation of Impact™, and the sustained control of Select. Together they give you a real rotation solution you won't find anywhere else.

- // **Gel** – Retains moisture and stays attractive, providing results even where sanitation is poor.
- // **Baits** – Place next to walls around shelving, flush mounted under drawers and next to base of large appliances.

// Maxforce FC Magnum

Clean Out

- // The most effective overall roach bait available in gel form
- // Same day results

// Maxforce Select

Maintenance

- // Kills both normal and bait-averse strains of roaches
- // Ideal bait acceptance

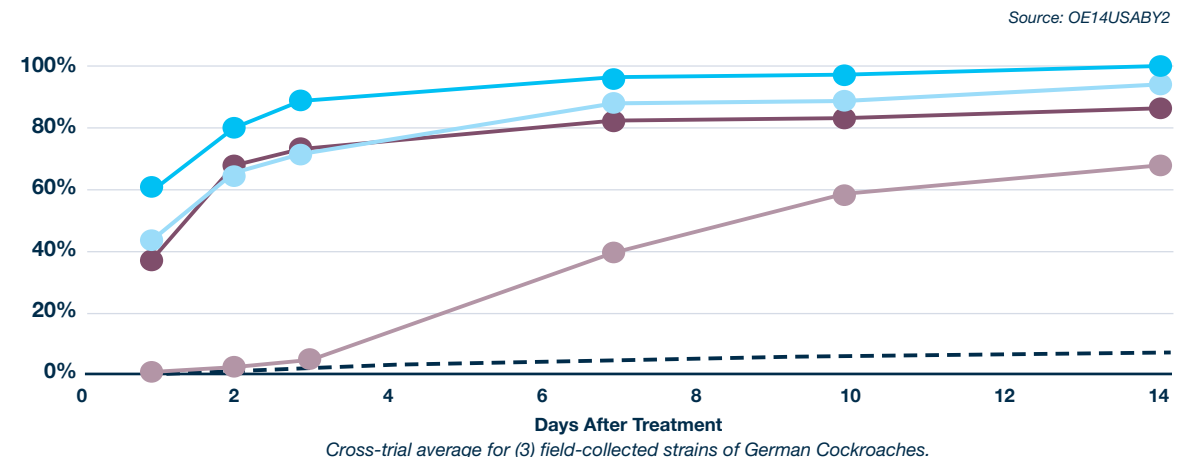

// Maxforce Impact

Rotation

- // Reduced risk status for cockroach control
- // Controlled release BlueBead technology

// Maxforce FC Roach Killer Bait Stations

- // Low-impact roach control for up to one year
- // Easy to monitor and replace for maximum account retention

Maxforce Impact Maxforce FC Magnum Advion® Vendetta® Plus Untreated

The 100% waterproof dust that doesn't clump or absorb moisture in wet areas.

/// DeltaDust®

- // Provides quick control of ants, cockroaches, flies and other listed pests
- // Labeled for roach control application directly into drains that lead to sewers
- // Kills crawling insects for up to 8 months when left undisturbed
- // Treat service ducts, false floors and ceilings as well as wall voids
- // Odorless
